

Find the Equivalent Fractions

LO: I can write the equivalent fraction.

Example: $\frac{1}{3} = \frac{2}{6}$

Fill in the numerator to make the fractions equivalent.

1.

$$\frac{1}{3} = \frac{\square}{6}$$

2.

$$\frac{2}{3} = \frac{\square}{6}$$

3.

$$\frac{1}{3} = \frac{\square}{12}$$

4.

$$\frac{1}{6} = \frac{\square}{12}$$

5.

$$\frac{5}{6} = \frac{\square}{12}$$

6.

$$\frac{2}{3} = \frac{\square}{24}$$

7.

$$\frac{1}{6} = \frac{\square}{24}$$

8.

$$\frac{1}{3} = \frac{\square}{24}$$

9.

$$\frac{5}{6} = \frac{\square}{24}$$

10.

$$\frac{1}{12} = \frac{\square}{24}$$

11.

$$\frac{5}{12} = \frac{\square}{24}$$

12.

$$\frac{11}{12} = \frac{\square}{24}$$
