

Ch2 and 3 day 3

To find 10% of a number, you divide the number by 10.

To find 40% of a number you divide the number by 10 and then multiply it by the first digit of the % (4) Examples: 70% of 70 = 49. 10% of 30 = 3

$$70 / 10 = 7$$

$$30 / 10 = 3$$

$$7 \times 7 = 49$$

Find Percentages of Quantities: 10%

I can calculate the percentage of a quantity.

21. 10% of 970 = _____

22. 30% of 440 = _____

23. 20% of 390 = _____

24. 10% of 420 = _____

25. 40% of 760 = _____

26. 90% of 930 = _____

27. 30% of 390 = _____

28. 90% of 580 = _____

29. 60% of 180 = _____

30. 80% of 480 = _____
