

Create Your Own Animal!

Name

What is the name of your animal?.....

How has your animal adapted to suit its environment?

What climate does your animal live in? Is it hot or cold? Is it sunny or rainy?

Describe your animal! Is it big or small? What colour is it? How does it move? What does it eat?

Draw your animal here!

Look at the example of Polar Animals and how they are suited to adapt to their environment.

Polar Animals

Some animals live in very hot places, e.g. snakes and camels live in deserts. Other animals live in extremely cold places, like the Arctic or Antarctic.

Polar Bears

Polar bears live in the ice and snow and hunt seals. Their bodies are adapted to the cold. This means their bodies have changed to help them stay warm.

Polar Bear Facts

- They have big feet for swimming through the sea. They spend most of their lives in water.
- Their fur is the same colour as the snow so they blend in.
- Their super sense of smell lets them know where to hunt for seals.
- They have sharp teeth to help them hunt and eat.

Penguin Facts

- They use their wings like flippers for swimming.
- They have waterproof feathers to keep them dry.
- They have lots of fat to stop them getting too cold.
- Their beaks open wide to catch and eat fish whole!

Did You Know...?

Penguins are found in both hot and cold places. Some kinds of penguin love hot weather!
