

Ch 2

Do your working-out using the column method and do not forget to line up the place value digits correctly and your decimal point too. Use paper to work out your answers then type them up under the questions here as a decimal number and show me your answer rounded to the nearest tenth.

Example Qn1: $0.41 - 0.32 = 0.09$ (rounded to the nearest tenth = 0.1)

So I must see your calculated answer and your rounded answer.

Remember the rule 5 or more, round up, 4 or less round down.

Subtraction of Hundredths (E)

1. $0.41 - 0.32 =$
2. $0.7 - 0.43 =$
3. $0.17 - 0.16 =$
4. $0.61 - 0.41 =$
5. $0.89 - 0.89 =$
6. $0.99 - 0.93 =$
7. $0.93 - 0.87 =$
8. $0.85 - 0.25 =$
9. $0.74 - 0.49 =$
10. $0.77 - 0.54 =$
11. $0.52 - 0.25 =$
12. $0.94 - 0.43 =$
13. $0.51 - 0.19 =$
14. $0.72 - 0.63 =$
15. $0.87 - 0.37 =$
