

Flowering Plants

Label each of the parts on the flowering plant

carpel style sepal filament
anther stigma petal ovary stamen

* These three items make up the _____.

These two items make up the _____.

Activity 2:

Match each of the parts of the flowering plant with the correct explanation of what it does.

stigma	A powdery substance (usually yellow) that causes plants to form seeds
stamen	Protect the flower while it is growing
filament	A stalk like structure that support the anther
petals	The female part of the flower
ovary	A stalk like structure that connects the stigma to the ovary
anther	The sticky part of the pistil where a pollen grain will attach and pollination will happen.
style	Produce pollen grains (the male cells)
carpel	The part of the stamen that contains the pollen
sepal	Help to hold nectar and attract insects
pollen	Where egg cells are stored, fertilised and grow into seeds
