

Flowering Plants

Activity 1: Label each of the parts on the flowering plant, researching and finding the names of the parts first.

* These three items make up the _____.

These two items make up the _____.

Activity 2

List each of the parts of the flowering plant and write an explanation of the role of each part – what does it do? Where is it? How does it help the plant within its life cycle?

Eg. Roots – they keep the plant anchored to the ground so it doesn't get blown away. They absorb water and nutrients/minerals from the soil.
