

Week 8 Day 2 Challenge 2/3

LO: I can solve subtraction word problems

1. There were 2165 plates delivered to a shop. Half of them were pink. The other half were blue. 587 were broken when they arrived. How many plates were unbroken?

2. Sam had £3277 in his bank account. He had been saving it for 18 years using his pocket money. His dad let him spend £1329 on a mountain bike that he could use in a 118 mile race. How much was left in his account?

3. Lisa collected 7212 tokens when she spent over £90 on her shopping. She swapped 4675 of them for a day at the local zoo which was 112 miles from her house. How many tokens did she have left?

4. Tim's story was about cars and it was 1871 words long. Tony's story was about pirates and it was only 1595 words long. How many more words did Tim write than Tony?

5. There are 7615 pages in my book. It is the seventh book in a series. I have read 4254 pages. How many more pages do I need to read before I can move onto the eighth book?
