

Week 4

Monday: Identify different perpendicular and parallel lines you can find at home and outside.

This video will help you to understand what parallel and perpendicular lines are - <https://www.bbc.co.uk/bitesize/topics/zb6tyrd/articles/zp327hv>

If you can't view the video, it is explained below.

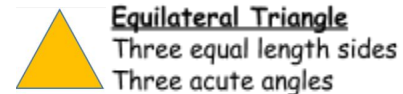

Parallel lines are always the same distance apart for their entire length.

Perpendicular lines cross each other at right angles.

Tuesday: Draw, label and find facts on as many 2D shapes as you can. E.g.,

Wednesday: Describe a shape without saying the name of it for someone to guess.

E.g., I have 4 equal sides and 4 right angles. What am I?

Thursday: Photograph and label as many 3D shapes that you can find. Remember, you can also find them outside as well.

Friday: Create your own unique 3D shape. Give it a name and write down its features.
