Dear Parents/Carers,

This week we had our Early year 'computational thinking' workshop for parents. Computational thinking is a way of solving problems by breaking a problem down into smaller pieces, finding patterns, and using trial and error. The parents were engaged and excited to learn how to help their children develop computational thinking skills. Parents also explored some activities that they could do at home to support their children's computational thinking skills. Parents enjoyed the workshop, and they left feeling more confident in their ability to support their children's learning. Thank you to all the parents for attending the workshop.

Year 2's visit to the Florence Nightingale Museum:

This week, the Year 2 children had the opportunity to visit the Florence Nightingale Museum, to understand why Florence Nightingale and Mary Seacole are famous. At the museum, children had some time to explore the artefacts. Children participated in an interactive performance by 'Florence' who spoke at length about her experiences growing up. These events led her to become a nurse and her experiences of helping soldiers during the Crimean War. They also learned about how she helped improve the state of hospitals and developed the nursing profession and how her contributions impact our lives today. Our children enjoyed a busy, informative, wonder-filled day that will stay with them for years.
