

Read, read, and read!

Next term, we will be learning about the UK. Children will be learning about the different countries within the UK and historical events such as the 'Great Fire of London'. We would like the year 2 pupils to read a range of books about these topics.

You could also visit the library and borrow a range of books based on what you like and read as much as possible to improve your speed, fluency and vocabulary.

Don't forget to login in to **Bug Club every day for 10 minutes**. Read your allocated books and answer the comprehension questions.

Great Fire of London

For our history unit we will be learning about the 'Great Fire of London'. We would like you to draw a beautiful portrait or create a 3D house from this event. Look below for some inspiration.

Maths Detectives

During the holiday, we would like your children to practise all the calculation strategies that they have learned this term so they don't forget. This includes column method addition and subtraction, with and without renaming, and solving multiplication and division number sentences by using their times table knowledge or by grouping and sharing.

If they are not secure in their number bonds to 10 and 20, please practise this too.

Make sure you login onto SplashLearn and TTRS to learn your 2,5,10 times tables!

English - Choose your most enjoyable day during the Christmas holidays and write a diary entry of what you did and how you felt. Remember to use the features of a diary entry, use conjunctions to extend your sentences and make sure all your sentences are punctuated correctly.
